Expert

SOFT SKILLS

Self-motivated

Quick Learner

Time Management

Highly skilled **Full Stack Developer** with **1.5 years** of expertise in **PL-SQL, Express.js, Node.js, React.js, and Redux.** Completed 14+ projects encompassing **front-end to back-end development.** Worked in **AWS services**, contributing to scalable and resilient cloud-based solutions.

EDUCATION

SJB INSTITUTE OF TECHNOLOGY   (August 01, 2018 - July 28, 2022)
B.E, Computer Science and Engineering.

WORK EXPERIENCE

Pointers Digitech Pvt Ltd.   (April 03, 2023 - Present)
Node Js Developer

- Spearheaded the integration of **DocuSign** to streamline the process of generating **offer letters** within the **organization**.
- Implemented seamless connectivity between internal systems and DocuSign, enhancing efficiency and accuracy in **document management**.
- Designed and developed a custom **Bot application** within the **Microsoft Teams** ecosystem to facilitate various **organizational** processes.
- Leveraged **Microsoft Teams** API to create a dynamic and interactive platform tailored to specific **organizational** needs.
- Engineered a bespoke **Bot application** integrated with **Slack**, enabling **real-time notifications** for crucial organizational activities.
- Orchestrated the setup for **feedback requests, OKRs notifications, review alerts, and recognition notifications** directly within **Slack, Teams** fostering a collaborative and responsive work environment.
- Proficiently implemented **PL-SQL** queries within the **organization's database environment**, optimizing data retrieval and manipulation processes.
- Ensured data integrity and reliability through effective **database management** practices, contributing to enhanced system performance and functionality.
- Created custom **API endpoints** to handle both POST and GET requests, ensuring efficient data transmission and retrieval.

Sharpener Tech   (October 28, 2022 - March 03, 2023)
Full Stack Developer

- worked on full stack projects such as **Expense tracker**, **Group Chat Application**, **E-commerce Website** etc.
- worked on **Aws** Such as **Ec2** instances, **Aws S3 Bucket**, **Aws Lambda, CI/CD Pipelines, Aws RDS,** etc.
- worked on **databases** such as **SQL, Sequelize, MongoDB**, etc.

PROJECTS

Food Delivery App
Developed user authentication, including sign-up, login, and forgot password functionality with SendGrid integration for email verification.

- Created separate user and admin dashboards for streamlined **navigation and management.**
- Integrated **Razorpay** for secure payment processing.
- Implemented **order tracking** with **real-time** status updates.
- Built an **admin panel** for efficient **user and order management.**
- Utilized **React.js, Node.js, Razorpay API, and SendGrid** for development.
